

Certified Products

Technology and value, Delivered

Introducing Edwards Certified: Reliable products, reasonable price

Certified products are pre-owned and factory-new ReManufactured with only Edwards original parts. This protects the quality, reliability and performance of your equipment. All Certified products leave one of our ReManufacturing facilities backed by a comprehensive 12 month parts and workmanship warranty supported by our Global Service network.

Certified products are provided with all the accessories required to install the product straight out of the box. Typical installation accessories include electrical connectors, water connectors, inlet & exhaust O-rings and full instructions for installation and usage.

What does this mean?

Certified products bring a number of key benefits to your business:

- **Emergency product replacement:** We have many Certified products available on the shelf for immediate shipment.
- **Cost effective:** Certified products perform against factory-set standards whilst being available at a lower cost than new equipment.
- **No need to re-qualify your process:** Where your process is designed around a specific model of pump which is no longer produced, Edwards Certified is the solution.
- **12 month comprehensive warranty:** All Certified products come with a comprehensive 12 month parts and workmanship warranty that covers all mechanical parts, electrical and electronic systems subject to Edwards standard terms and conditions.

Due to the rapidly changing nature of the Certified equipment market please contact Edwards in the first instance to ensure product availability before ordering.

Certified products are a cost effective and environmentally friendly option to acquire vacuum pumps
